August 14, 2020 marked the 75th birthday of American actor, comedian, author, filmmaker, and musician, Stephen Glenn Martin [1]. Martin was born in Waco, Texas, on August 14, 1945. I prepared the following birthday curiosities in his honor:

1. Before he turned 75, Martin was 74 years old. Interestingly, Martin was born on 8/14 and 814 equals 74 times the sum of the digits of 74, namely 11.
2. If numbers 1 through 26 are assigned to letters A through Z, the letter numbers of Martin add up to his new age, 75.
3. Further, the sum of the letter numbers of Steve Martin equals 146 and the prime factors of 146, namely 2 and 73, add up to 75 too.
4. Additionally, if 75 is split as 7 and 5, note that the name Stephen has 7 letters, Glenn consists of 5 letters, and Martin contains 6 letters, 6 being the arithmetical average of 7 and 5.
5. Moreover, two years from now, Martin's 77th birthday expressed as 8/14/22 will be special since $8+14=22$.
6. Lastly, the prime factors of 77, namely 7 and 11, add up to 18 and coincidentally, Stephen Glenn Martin is made of 18 letters.

Happy 75th birthday, Steve Martin!
