EGR 110 Students,

The end of the semester will be here faster than we think. Please keep in mind the commitments you have for EGR 110.

Beta test. The evaluation of your devices will take place during the beta test period Nov. 15 – 20. Note that the dates are slightly different than those listed on the syllabus. A schedule for beta test meetings is shown below. Your device/project should be completed before your scheduled beta test. For the beta test, your device should be set up and ready to be demonstrated at the scheduled time. Please arrive early.

Open House. The Open House is scheduled for Saturday 23 Nov. During the beta test, faculty will evaluate the results of your effort. They will select 5 – 10 projects for display at the Open House. The 5 – 10 teams that are selected should be available on the morning of the Open House to demonstrate the device, discuss the project, or present the results (depending on the type of project/device).. Since we will not know who the selected teams are until after the last beta test, everyone should be prepared to attend the Open House.

Beta Test Schedule – conducted in Shiley 110 during regular class time.
