

For Phase 1 of the ME328 project, the following will be available:

Lego Mindstorm Kits. Teams can check out a LEGO kit from Christina Chrestatos in the shop during the week of 2/10, just ring the doorbell near SH110 (near the makerspace area). At least one member of the team can stop by any time (8:30am-4:30pm) February 10 to 15. Since she is in and out of the shop, she will make sure to be available on 2/13 and 2/14 from 12pm-3pm.

Test facilities are located in the hall way outside the makerspace:

- Motor dynamometer (google it, if you don't know what it is)
- Plow-pulling test facility will be available in the hall way outside the makerspace.
- Various weights and spring-scales will be available as well in the test area.
