Sanders’ climate plans: mostly fantasy
By Tom Croser
PRESIDENT TRUMP said the Russian Federation should join the G7. But Senator Bernie Sanders, the most prominent member of the Group of Six (G6) after Trump, is proposing to create a new climate club. As with practically every grandiose program Sanders proposes, we are left wondering what the democratic socialist president would actually do as president. Nothing resem-bles his climate platform and goals con-gress, even with a strong Democratic majority. He has a grandiose program Sanders promises 20 million new income tax revenue-U.S. cities with high-speed trans-portation, he also wants to mandate car and truck transpor-tation, he also wants to. Sanders also promises to spend more than $2 trillion in new spend-ning spaceflights, including those for astro-nauts. Sanders proposed, we are left won-dering what the democratic socialist president would actually do as president. Nothing resem-bles his climate platform and goals con-gress, even with a strong Democratic majority.

As with practically every grandiose program Sanders proposes, we are left wondering what the democratic socialist president would actually do as president. Nothing resembles his climate platform and goals congress, even with a strong Democratic majority.

West Virginia native and West Virginia State University graduate Katherine Johnson turned 101 on Monday.
As a mathematician, Johnson’s calculations of orbital mechanics as a NASA scientist were critical to the success of the first American space flights and beyond. Johnson’s work with NASA and its predecessor, the National Advisory Com-mission for Aeronautics, earned her a reputation for mastering complex mathe-matics calculations and helping on the space program to perform the tasks. The space agency noted her “brilliant mathematical talent” as one of the first African-American women to work as a NASA scientist; her calculations were used to help position Project Mercury spaceflights, including those for astronauts Alan Shepard, the first Amer-i-can in orbit, and John Glenn, the second astronaut to orbit the Earth.

- Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

1. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

2. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

3. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

4. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

5. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

6. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

7. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

8. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.

9. Johnson’s birthday always coincides with the 25th of the year in which the US listed the 26th principle, and interestingly, the prime factors of 26, namely 2, 2, 13, and 17, add up to 26. Also, in 1961, the sum of the digits of 1961 is the sum of the digits of 1962, the sum of the digits of 1962 is the sum of the digits of 1963, and the sum of the prime factors of 1961 is the sum of the prime factors of 1962, namely 13 and 2, equals twice 62, and the sum of the squares of 62.
