Birthday curiosities for Kamala Harris

By AZIZ INAN

American politician and attorney Kamala Devi Harris who has served as a United States senator is the running mate of the Democratic Party's presidential nominee, former vice president Joe Biden, in the 2020 US election.

Harris is the first African American, the first Asian American, and the third female vice presidential running mate on a major party ticket "I am who I am": Harris, daughter of Indian and Jamaican immigrants, defines herself simply as "American."

Harris was born on October 20, 1964 in Oakland, California and she turned 56 this month on October 20. I prepared the following birthday curiosities for her to recognize her hard work for equality and social justice:

1. If Harris's 56th birthday, 10/20/2020, is split as 10, 20, 20, and 20, then  $5 \times 6 = 10 + 20$ ,  $20 = 1 + 9 + 6 + 4$ , and if numbers 1 through 26 are assigned to letters A through Z, the sum of the letter numbers of Devi equals  $40 = 20 + 20$ .
2. The letter numbers of Kamala Harris add up to 112 and 112 is twice 56, Harris's new age.
3. Furthermore, ten times 112 yields 1120, Biden's birthdate, 11/20. (Biden was born on 11/20/1942.)
4. The sum of the letter numbers of Harris equals 73 and coincidentally, there are 73 days from Harris's birthdate until the end of each year.
5. Additionally, 73 equals the sum of the letter numbers of Joseph.
6. Also, 30 (see item # 1) coincides with the sum of the letter numbers of Joe.

7. Moreover, the rightmost two digits of Harris's birth year, namely 64, equals the sum of the letter numbers of Joe Biden.
8. Twenty years ago, Harris's 36th birthday on 10/20/2000 was numerically special since 2000 equals four times the sum of the squares of 10 and 20.
9. Ten years ago, Harris's 46th birthday, 10/20/2010, was special too because if split as 1020 and 2010, 2010 interpreted as 20 October (20/10) represented her birthdate.
10. Ten years later, Harris's 66th birthday, 10/20/30, will be special since  $10 + 20 = 30$ .
11. Twenty years later, Harris's 76th birthday, 10/20/2040, will be special too because if split as 1020 and 2040, 2040 is twice 1020. Also, the rightmost two digits of 2040, namely 40, equals the sum of the letter numbers of Devi.
12. Further, twice 76 equals 152 and 152 is the sum of the letter numbers of Kamala Devi Harris.
13. Harris's 100th birthday on 10/20/2064 will also be special since the sum of the 10th and 20th prime numbers, namely 29 and 71, equals 100.
14. Lastly, 31 days after Harris's 56th birthday, on 11/20, Biden will turn 78 and interestingly,  $7 \times 8 = 56$ ,  $5 + 6 = 11$ , the 11th prime number is 31,  $31 = 11 + 20$ , and ten times the sum of the 11th and 20th prime numbers, namely 31 and 71, yields 1020, Harris's birthdate (10/20).

**Happy 56th birthday, Kamala Harris!**
